About Surveillance Solutions

Today's environment has made security the most integral part for any size of establishments (Small, Medium and Large) even government for that matter we offer complete Surveillance Solutions from IP Video, Mobile surveillance, CCTV DVR, Access Control to Integrated systems.

Storage Solutions

SAN Storage	Dell, Promise
DAS Storage	Dell, Lenovo EMC
Server	Dell

Backup	Dell LTO, Lenovo NAS
Workstation	Dell, Lenovo
Cabling & Connectivity	Belkin, Leviton

About Storage Solutions

SAN is especially important for bandwidth-intensive applications such as database, imaging and transaction processing. The distributed architecture of a SAN also enables it to offer higher levels of performance and availability than any other storage medium today. The benefit is that large numbers of users can simultaneously access data without creating bottlenecks on the local area network and servers.

DAS is Ideal for localized file sharing in environments with a single server or a few servers - for example, small businesses or departments and workgroups that do not need to share information over long distances or across an enterprise. Small companies traditionally utilize DAS for file serving and e-mail, while larger enterprises may leverage DAS in a mixed storage environment that likely includes NAS and SAN.

NAS is an ideal choice for organizations looking for a simple and cost-effective way to achieve fast data access for multiple clients at the file level. Implementers of NAS benefit from performance and productivity gains.

Networking Solutions

Desktop	Lenovo, Dell, Acer
Laptops	Lenovo, Dell, Acer
Printer	Xerox
Nas/LTO	Lenovo, Dell
RAM	Corsair, UMAX

Switches	Alcatel-Lucent, Dell
